SECREI

SECRET

SECRET

25X1 **∞3** ∞ At about 1800 on 15 October, a shipment with approximately 15 trucks. each towing 1 x 37-mm AA gun, 3 armored personnel carriers 25X1 and 3 boxcars, each occupied by 20 to 25 soldiers wearing red bordered black epaulets, left Riesa toward 25X1 On 18 October, the following columns went from Koenigsbrueck toward Noues Lager 25X1 25X1 25X1 1, Comment. At noon on 12 October, a mixed combat group of the Sth Gds Mecz Div arrived at the Zeithein training grounds. Whements of this group were observed leaving Grimma in the morning of the same 25X1 25X1 . After a 24-hour stay at the training grounds, the unit concerned proceeded eastwar, probably at least as far as Ortrand and, possibly, from there joined the combat group at the Zeithain training grounds also belonged to the 8th Gds Meez Div 25X1 propably made in connection with exercises which were held at an undetermined location. 25X1 Comment. In the afternoon on 13 October, the U/i Arty Regt and elements of the 218th Mort Regt of the 9th Tank Div marched toward Grossenhain. The first mentioned unit came from the Zeithain training grounds and the second unit from its Riesa post, It is possible that the bulk of the Mort Regt left the Zeithain training grounds after the Arty Regt. Since no information has been received on a final fall exercise of the 9th Tank Div, the units may have left for an exercise which started after 14 October. 3. 25X1 The fact that the columns proceeded toward Neues Lager does not necessarily mean that they entered the installation. Since many vehicles, particularly some 25X1 of the column seen at 1630, belonged to the 9th Tank Div, it appears possible that exercises of the division were still under way on 18 October. Nodex
